## Are You Planning To Buy, Rent, or Renovate a Home Built Before 1978?

---

**M**any houses and apartments built before 1978 have paint that contains lead (called lead-based paint). Lead from paint, chips, and dust can pose serious health hazards if not taken care of properly.

Federal law requires that individuals receive certain information before renting, buying, or renovating pre-1978 housing:

**LANDLORDS** have to disclose known information on lead-based paint and lead-based paint hazards before leases take effect. Leases must include a disclosure form about lead-based paint.

**SELLERS** have to disclose known information on lead-based paint and lead-based paint hazards before selling a house. Sales contracts must include a disclosure form about lead-based paint. Buyers have up to 10 days to check for lead hazards.

**RENOVATORS** have to give you this pamphlet before starting work. (After June 1, 1999.)

**IF YOU WANT MORE INFORMATION** on these requirements, call the National Lead Information Clearinghouse at **1-800-424-LEAD**.

---

This document is in the public domain. It may be reproduced by an individual or organization without permission. Information provided in this booklet is based upon current scientific and technical understanding of the issues presented and is reflective of the jurisdictional boundaries established by the statutes governing the co-authoring agencies. Following the advice given will not necessarily provide complete protection in all situations or against all health hazards that can be caused by lead exposure.

# IMPORTANT!

## Lead From Paint, Dust, and Soil Can Be Dangerous If Not Managed Properly

- FACT:** Lead exposure can harm young children and babies even before they are born.
- FACT:** Even children who seem healthy can have high levels of lead in their bodies.
- FACT:** People can get lead in their bodies by breathing or swallowing lead dust, or by eating soil or paint chips containing lead.
- FACT:** People have many options for reducing lead hazards. In most cases, lead-based paint that is in good condition is not a hazard.
- FACT:** Removing lead-based paint improperly can increase the danger to your family.

If you think your home might have lead hazards, read this pamphlet to learn some simple steps to protect your family.

## Lead Gets in the Body in Many Ways

---

**In the United States, about 900,000 children ages 1 to 5 have a blood-lead level above the level of concern.**

***Even children who appear healthy can have dangerous levels of lead in their bodies.***

**People can get lead in their body if they:**

- ◆ Put their hands or other objects covered with lead dust in their mouths.
- ◆ Eat paint chips or soil that contains lead.
- ◆ Breathe in lead dust (especially during renovations that disturb painted surfaces).

**Lead is even more dangerous to children than adults because:**

- ◆ Babies and young children often put their hands and other objects in their mouths. These objects can have lead dust on them.
- ◆ Children's growing bodies absorb more lead.
- ◆ Children's brains and nervous systems are more sensitive to the damaging effects of lead.

### Lead's Effects

If not detected early, children with high levels of lead in their bodies can suffer from:

- ◆ Damage to the brain and nervous system
- ◆ Behavior and learning problems (such as hyperactivity)
- ◆ Slowed growth
- ◆ Hearing problems
- ◆ Headaches

**Lead is also harmful to adults. Adults can suffer from:**

- ◆ Difficulties during pregnancy
- ◆ Other reproductive problems (in both men and women)
- ◆ High blood pressure
- ◆ Digestive problems
- ◆ Nerve disorders
- ◆ Memory and concentration problems
- ◆ Muscle and joint pain

---

***Lead affects  
the body in  
many ways.***

---

## Where Lead-Based Paint Is Found

---

**In general, the older your home, the more likely it has lead-based paint.**

---

**Many homes built before 1978 have lead-based paint.** The federal government banned lead-based paint from housing in 1978. Some states stopped its use even earlier. Lead can be found:

- ◆ In homes in the city, country, or suburbs.
- ◆ In apartments, single-family homes, and both private and public housing.
- ◆ Inside *and* outside of the house.
- ◆ In soil around a home. (Soil can pick up lead from exterior paint or other sources such as past use of leaded gas in cars.)

## Checking Your Family for Lead

---

**Get your children and home tested if you think your home has high levels of lead.**

---

**To reduce your child's exposure to lead, get your child checked, have your home tested (especially if your home has paint in poor condition and was built before 1978), and fix any hazards you may have.**

Children's blood lead levels tend to increase rapidly from 6 to 12 months of age, and tend to peak at 18 to 24 months of age.

Consult your doctor for advice on testing your children. A simple blood test can detect high levels of lead. Blood tests are usually recommended for:

- ◆ Children at ages 1 and 2.
- ◆ Children or other family members who have been exposed to high levels of lead.
- ◆ Children who should be tested under your state or local health screening plan.

Your doctor can explain what the test results mean and if more testing will be needed.

## Where Lead Is Likely To Be a Hazard

---

**Lead-based paint** that is in good condition is usually not a hazard.

**Peeling, chipping, chalking, or cracking lead-based paint** is a hazard and needs immediate attention.

Lead-based paint may also be a hazard when found on surfaces that children can chew or that get a lot of wear-and-tear.

These areas include:

- ◆ Windows and window sills.
- ◆ Doors and door frames.
- ◆ Stairs, railings, and banisters.
- ◆ Porches and fences.

**Lead dust** can form when lead-based paint is dry scraped, dry sanded, or heated. Dust also forms when painted surfaces bump or rub together. Lead chips and dust can get on surfaces and objects that people touch. Settled lead dust can re-enter the air when people vacuum, sweep, or walk through it.

**Lead in soil** can be a hazard when children play in bare soil or when people bring soil into the house on their shoes. Call your state agency (see page 11) to find out about testing soil for lead.

---

**Lead from paint chips, which you can see, and lead dust, which you can't always see, can both be serious hazards.**

---

## Checking Your Home for Lead Hazards

---

**Just knowing that a home has lead-based paint may not tell you if there is a hazard.**

---

You can get your home checked for lead hazards in one of two ways, or both:

- ◆ A paint **inspection** tells you the lead content of every different type of painted surface in your home. It won't tell you whether the paint is a hazard or how you should deal with it.
- ◆ A **risk assessment** tells you if there are any sources of serious lead exposure (such as peeling paint and lead dust). It also tells you what actions to take to address these hazards.

Have qualified professionals do the work. *There are standards in place for certifying lead-based paint professionals to ensure the work is done safely, reliably, and effectively.* Contact your state lead poisoning prevention program for more information. Call 1-800-424-LEAD for a list of contacts in your area.

Trained professionals use a range of methods when checking your home, including:

- ◆ Visual inspection of paint condition and location.
- ◆ A portable x-ray fluorescence (XRF) machine.
- ◆ Lab tests of paint samples.
- ◆ Surface dust tests.

**Home test kits for lead are available, but studies suggest that they are not always accurate.** Consumers should not rely on these tests before doing renovations or to assure safety.

## What You Can Do Now To Protect Your Family

---

If you suspect that your house has lead hazards, you can take some immediate steps to reduce your family's risk:

- ◆ If you rent, notify your landlord of peeling or chipping paint.
- ◆ Clean up paint chips immediately.
- ◆ Clean floors, window frames, window sills, and other surfaces weekly. Use a mop or sponge with warm water and a general all-purpose cleaner or a cleaner made specifically for lead. REMEMBER: NEVER MIX AMMONIA AND BLEACH PRODUCTS TOGETHER SINCE THEY CAN FORM A DANGEROUS GAS.
- ◆ Thoroughly rinse sponges and mop heads after cleaning dirty or dusty areas.
- ◆ Wash children's hands often, especially before they eat and before nap time and bed time.
- ◆ Keep play areas clean. Wash bottles, pacifiers, toys, and stuffed animals regularly.
- ◆ Keep children from chewing window sills or other painted surfaces.
- ◆ Clean or remove shoes before entering your home to avoid tracking in lead from soil.
- ◆ Make sure children eat nutritious, low-fat meals high in iron and calcium, such as spinach and dairy products. Children with good diets absorb less lead.

## How To Significantly Reduce Lead Hazards

---

---

**Removing lead improperly can increase the hazard to your family by spreading even more lead dust around the house.**

---

*Always use a professional who is trained to remove lead hazards safely.*

---

In addition to day-to-day cleaning and good nutrition:

- ◆ You can **temporarily** reduce lead hazards by taking actions such as repairing damaged painted surfaces and planting grass to cover soil with high lead levels. These actions (called “interim controls”) are not permanent solutions and will need ongoing attention.
- ◆ To **permanently** remove lead hazards, you must hire a certified lead “abatement” contractor. Abatement (or permanent hazard elimination) methods include removing, sealing, or enclosing lead-based paint with special materials. Just painting over the hazard with regular paint is not enough.

Always hire a person with special training for correcting lead problems—someone who knows how to do this work safely and has the proper equipment to clean up thoroughly. Certified contractors will employ qualified workers and follow strict safety rules as set by their state or by the federal government.

Call your state agency (see page 11) for help with locating certified contractors in your area and to see if financial assistance is available.

## Remodeling or Renovating a Home With Lead-Based Paint

---

Take precautions before your contractor or you begin remodeling or renovations that disturb painted surfaces (such as scraping off paint or tearing out walls):

- ◆ **Have the area tested for lead-based paint.**
- ◆ **Do not use a belt-sander, propane torch, heat gun, dry scraper, or dry sandpaper** to remove lead-based paint. These actions create large amounts of lead dust and fumes. Lead dust can remain in your home long after the work is done.
- ◆ **Temporarily move your family** (especially children and pregnant women) out of the apartment or house until the work is done and the area is properly cleaned. If you can't move your family, at least completely seal off the work area.
- ◆ **Follow other safety measures to reduce lead hazards.** You can find out about other safety measures by calling 1-800-424-LEAD. Ask for the brochure "Reducing Lead Hazards When Remodeling Your Home." This brochure explains what to do before, during, and after renovations.

If you have already completed renovations or remodeling that could have released lead-based paint or dust, get your young children tested and follow the steps outlined on page 7 of this brochure.

---

**If not conducted properly, certain types of renovations can release lead from paint and dust into the air.**

---

## Other Sources of Lead

---

---

*While paint, dust, and soil are the most common lead hazards, other lead sources also exist.*

---

- ◆ **Drinking water.** Your home might have plumbing with lead or lead solder. Call your local health department or water supplier to find out about testing your water. You cannot see, smell, or taste lead, and boiling your water will not get rid of lead. If you think your plumbing might have lead in it:
  - Use only cold water for drinking and cooking.
  - Run water for 15 to 30 seconds before drinking it, especially if you have not used your water for a few hours.
- ◆ **The job.** If you work with lead, you could bring it home on your hands or clothes. Shower and change clothes before coming home. Launder your work clothes separately from the rest of your family's clothes.
- ◆ **Old painted toys and furniture.**
- ◆ **Food and liquids stored in lead crystal or lead-glazed pottery or porcelain.**
- ◆ **Lead smelters** or other industries that release lead into the air.
- ◆ **Hobbies** that use lead, such as making pottery or stained glass, or refinishing furniture.
- ◆ **Folk remedies** that contain lead, such as "greta" and "azarcon" used to treat an upset stomach.

## For More Information

---

### The National Lead Information Center

Call **1-800-424-LEAD** to learn how to protect children from lead poisoning and for other information on lead hazards. (Internet: **[www.epa.gov/lead](http://www.epa.gov/lead)** and **[www.hud.gov/lea](http://www.hud.gov/lea)**).

For the hearing impaired, call the Federal Information Relay Service at **1-800-877-8339** and ask for the National Lead Information Center at **1-800-424-LEAD**.

### EPA's Safe Drinking Water Hotline

Call **1-800-426-4791** for information about lead in drinking water.

### Consumer Product Safety Commission Hotline

To request information on lead in consumer products, or to report an unsafe consumer product or a product-related injury call **1-800-638-2772**. (Internet: **[www.cpsc.gov](http://www.cpsc.gov)**). For the hearing impaired, call **TDD 1-800-638-8270**.

### State Health and Environmental Agencies

Some cities and states have their own rules for lead-based paint activities. Check with your state agency to see if state or local laws apply to you. Most state agencies can also provide information on finding a lead abatement firm in your area, and on possible sources of financial aid for reducing lead hazards. Receive up-to-date address and phone information for state and local contacts on the Internet at **[www.epa.gov/lead](http://www.epa.gov/lead)** or contact the National Lead Information Center at **1-800-424-LEAD**.

## EPA Regional Offices

---

Your Regional EPA Office can provide further information regarding regulations and lead protection programs.

(202) 755-1785

## Simple Steps To Protect Your Family From Lead Hazards

### If you think your home has high levels of lead:

- ◆ Get your young children tested for lead, even if they seem healthy.
- ◆ Wash children's hands, bottles, pacifiers, and toys often.
- ◆ Make sure children eat healthy, low-fat foods.
- ◆ Get your home checked for lead hazards.
- ◆ Regularly clean floors, window sills, and other surfaces.
- ◆ Wipe soil off shoes before entering house.
- ◆ Talk to your landlord about fixing surfaces with peeling or chipping paint.
- ◆ Take precautions to avoid exposure to lead dust when remodeling or renovating (call 1-800-424-LEAD for guidelines).
- ◆ Don't use a belt-sander, propane torch, heat gun, dry scraper, or dry sandpaper on painted surfaces that may contain lead.
- ◆ Don't try to remove lead-based paint yourself.

**Recycled/Recyclable**

Printed on paper that contains at least 20 percent postconsumer fiber.

**40 CFR Part 745:**  
**Lead-Based Paint Hazards**

among young children by supporting the implementation of the national lead program. Because exposure to lead in paint, dust, and soil is mostly limited to children under the age of 6, young children are, in fact, the primary beneficiaries of this proposed rule, as well as the program.

#### *G. National Technology Transfer and Advancement Act*

This proposed regulatory action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Pub. L. 104-113, section 12(d) (15 U.S.C. 272 note). Section 12(d) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, business practices, etc.) that are developed or adopted by voluntary consensus standards bodies. The NTTAA requires EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards. EPA invites public comment on this conclusion.

#### **List of Subjects in Part 745**

Environmental protection, Hazardous substances, Lead-based paint, Lead poisoning, Reporting and recordkeeping requirements.

Dated: May 26, 1998.

**Carol M. Browner,**  
*Administrator.*

Therefore, it is proposed that 40 CFR part 745 be amended as follows:

#### **PART 745—[AMENDED]**

1. The authority citation for part 745 continues to read as follows:

**Authority:** 15 U.S.C. 2605, 2607, 2615, 2681-2692 and U.S.C. 4852d.

2. By adding new subpart D to read as follows:

#### **Subpart D—Lead-Based Paint Hazards**

##### **Sec.**

745.61 Scope and applicability.  
745.63 Definitions.  
745.65 Lead-based paint hazards.  
745.69 Determining whether lead-based paint hazards are present.

#### **Subpart D—Lead-Based Paint Hazards**

##### **§ 745.61 Scope and applicability.**

(a) This subpart identifies lead-based paint hazards.

(b) The standards for lead-based paint hazards apply to target housing and child-occupied facilities.

(c) Nothing in this subpart requires any person to evaluate the property(ies) for the presence of lead-based paint hazards or to take any action to control these conditions if one or more of them is identified.

##### **§ 745.63 Definitions.**

The following definitions apply to this subpart.

*Arithmetic mean* means the algebraic sum of data values divided by the number of data values (e.g., the sum of the concentration of lead in several soil samples divided by the number of samples).

*Certified risk assessor* means an individual who has been trained by an accredited training program, as defined by § 745.223, and certified by EPA pursuant to § 745.226 or by an authorized State or Tribal program to conduct risk assessments. A certified risk assessor also samples for the presence of lead in dust and soil for the purposes of abatement clearance testing.

*Child-occupied facility* means a building, or portion of a building, constructed prior to 1978, visited regularly by the same child, 6 years of age or under, on at least two different days within any week (Sunday through Saturday period), provided that each day's visit lasts at least 3 hours and the combined weekly visit lasts at least 6 hours, and the combined annual visits last at least 60 hours. Child-occupied facilities may include, but are not limited to, day-care centers, preschools, and kindergarten classrooms.

*Deteriorated paint* means paint that is cracking, flaking, chipping, peeling, or otherwise separating from the substrate of a building component.

*Interior window sill* means the portion of the horizontal window ledge that protrudes into the interior of the room.

*Lead-based paint* means paint or other surface coatings that contain lead equal to or exceeding 1.0 milligram per square centimeter or 0.5 percent by weight.

*Lead-based paint hazard* means hazardous lead-based paint, a dust-lead hazard, or a soil-lead hazard as described in § 745.65.

*Paint in poor condition* means more than 10 square feet of deteriorated paint on exterior components with large surface areas; or more than 2 square feet of deteriorated paint on interior

components with large surface areas (e.g., walls, ceilings, floors, doors); or more than 10 percent of the total surface area of the component is deteriorated on interior or exterior components with small surface areas (e.g., window sills, baseboards, soffits, trim).

*Risk assessment* means an on-site investigation to determine the existence, nature, severity, and location of lead-based paint hazards, and the provision of a report by the individual or the firm conducting the risk assessment, explaining the results of the investigation and options for reducing lead-based paint hazards.

*Target housing* means any housing constructed prior to 1978, except housing for the elderly or persons with disabilities (unless any one or more children age 6 years or under resides or is expected to reside in such housing for the elderly or persons with disabilities) or any 0-bedroom dwelling.

*Weighted arithmetic mean* means the arithmetic mean of sample results weighted by the number of subsamples in each sample. Its purpose is to give influence to a sample relative to the number of subsamples it contains. A single surface sample is comprised of a single subsample. A composite sample may contain from two to four subsamples. The weighted arithmetic mean is obtained by summing for all samples, the product of the sample's result multiplied by the number of subsamples in the sample, and dividing the sum by the total number of subsamples contained in all samples. For example, the weighted arithmetic mean of a single surface sample containing 60 µg/ft<sup>2</sup>, a composite sample (3 subsamples) containing 100 µg/ft<sup>2</sup>, and a composite sample (4 subsamples) containing 110 µg/ft<sup>2</sup> is 100 µg/ft<sup>2</sup>. This result is based on the equation  $[60 + (3 \times 100) + (4 \times 110)] / 8$ .

*Wipe sample* means a sample collected by wiping a representative surface of known area with an acceptable wipe material (e.g., moist towelette).

##### **§ 745.65 Lead-based paint hazards.**

(a) *Hazardous lead-based paint.* Hazardous lead-based paint is lead-based paint in poor condition.

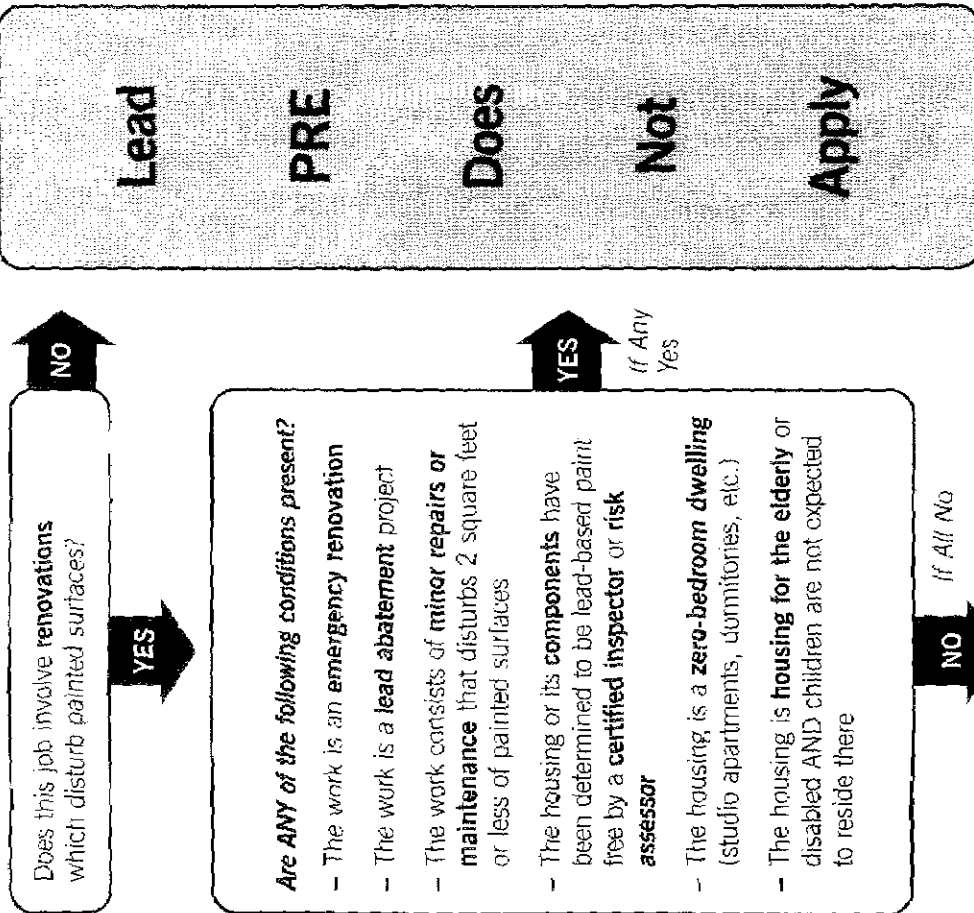

(b) *Dust-lead hazard.* A dust-lead hazard is dust that contains lead equal to or exceeding 50 µg/ft<sup>2</sup> on uncarpeted floors or 250 µg/ft<sup>2</sup> on interior window sills based on wipe samples.

(c) *Soil-lead hazard.* A soil-lead hazard is bare soil that contains total lead equal to or exceeding 2,000 parts per million.

**The Lead-Based Paint  
Pre-Renovation Education Rule**

# The Lead Pre-Renovation Education Rule (Lead PRE) At-A-Glance

If you will be working for **compensation** in a pre-1978 home or apartment building, answer the questions below to determine if Lead PRE requires you to give the **lead pamphlet** to the **owner** and occupants.

**If no, then you need to read this book! Rental property owners and managers, renovators, and maintenance personnel are affected by Lead PRE.**

**Bold Type** - Key Terms (see pages 8-10 inside)

## What Is The Lead-Based Paint

### Pre-Renovation Education Rule (Lead PRE)?

- The Lead PRE Rule is a Federal regulation affecting construction contractors, property managers, and others who perform **renovations** for **compensation** in residential housing that may contain lead-based paint.
- It applies to residential houses and apartments built before 1978.
- It requires distribution of the **lead pamphlet**, *Protect Your Family from Lead in Your Home*, to the owners and occupants before starting **renovation** work.
- **Renovation** includes most repair, remodeling, and maintenance activities that disturb painted surfaces.
- Lead PRE implements Section 406(b) of the Toxic Substances Control Act (TSCA).

### About This Handbook

- This handbook summarizes Lead PRE and how to comply with it. To ensure compliance, you should also read the rule.
- Key terms are highlighted in **bold** and are explained on pages 8-10.

### Who Should Read This Handbook?

- Anyone who owns or manages housing built before 1978.
- Contractors who perform **renovations** (including certain repairs and maintenance) which disturb paint in homes built before 1978.

### How Can This Handbook Help Me?

- This handbook presents simple steps to follow to comply with Lead PRE. It also lists ways these steps can be easily incorporated into your work.
- Having demonstrated knowledge of lead requirements and safety practices can mean more business for you.
- Distributing the **lead pamphlet** to your customers and tenants can help them protect themselves and their children from the hazards of lead-based paint.
- This handbook describes the law. It also explains the proper steps to take to avoid potentially significant civil (monetary) and criminal fines and penalties.

## Where Can I Get Copies of the Lead Pamphlet?

For single copies of *Protect Your Family From Lead in Your Home* (in Spanish or English), call the National Lead Information Clearinghouse (NLIC) at 1-800-424-LEAD. For any orders, be sure to use the stock reference number **EPA747-K-99-001**.

There are four ways to get multiple copies:

1. Call the Government Printing Office order desk at (202) 512-1800.
2. Send fax requests to (202) 512-2233.
3. Request copies in writing from:  
Superintendent of Documents  
P.O. Box 371954  
Pittsburgh, PA 15250-7954
4. Obtain via the Internet at [www.epa.gov/lead](http://www.epa.gov/lead)

Single copies are available at no charge. Bulk copies available in packs of 50.

The pamphlet may be photocopied for distribution as long as the text and graphics are readable. Camera-ready copies are available from NLIC or via the Internet.

## Sample Forms (continued)

**Renovation Notice** — For use in notifying tenants of renovations in common areas of multi-family housing.

The following renovation activities will take place in the following locations:

Activity (e.g., sanding, window replacement) \_\_\_\_\_

Location (e.g., lobby, recreation center) \_\_\_\_\_

The expected starting date is \_\_\_\_\_ and the expected ending date is \_\_\_\_\_. Because this is an older building built before 1978, some of the paint disturbed during the renovation may contain lead. You may obtain a copy of the pamphlet, *Protect Your Family From Lead in Your Home*, by telephoning me at \_\_\_\_\_. Please leave a message and be sure to include your name, phone number and address. I will either mail you a pamphlet or slide one under your door.

Date \_\_\_\_\_

Printed name of renovator \_\_\_\_\_

Signature of renovator \_\_\_\_\_

**Record of Tenant Notification Procedures** — Procedures Used For Delivering Notices to Tenants of Renovations in Common Areas

Project Address:

Street \_\_\_\_\_ (apt. #) \_\_\_\_\_

City \_\_\_\_\_ State \_\_\_\_\_ Zip Code \_\_\_\_\_

Owner of multi-family housing \_\_\_\_\_ Number of dwelling units \_\_\_\_\_

Method of delivering notice forms (e.g. delivery to units, delivery to mailboxes of units) \_\_\_\_\_

Name of person delivering notices \_\_\_\_\_

Signature of person delivering notices \_\_\_\_\_ Date of Delivery \_\_\_\_\_

## What Does Lead PRE Require Me To Do?

1. Distribute a **lead pamphlet** to the housing **owner** and occupants before **renovation** starts.
2. Obtain **confirmation of receipt of lead pamphlet** (see page 11) from owner and occupants or a **certificate of mailing** from the post office.
3. For work in **common areas of multi-family housing**, distribute **renovation notices** to tenants.
4. Retain records for 3 years.

(See page 4 for more details)

## Who Must Follow These Requirements?

In general, anyone whose compensated work disturbs paint in housing built before 1978, including:

- Residential rental property owners/managers
- **General contractors**
- **Special trade contractors**, including
  - Painters
  - Plumbers
  - Carpenters
  - Electricians

## What Types Of Activities Are Subject To Lead PRE?

In general, any activity that disturbs paint in pre-1978 housing, including:

- Remodeling and repair/maintenance
- Plumbing
- Carpentry
- Electrical work
- Painting
- Window replacement

## What Housing Or Activities Are Excluded From Lead PRE?

- Housing built in 1978 or later
- Housing for the elderly or disabled persons (unless children will reside there)
- Zero-bedroom dwellings (studio apartment, dormitories, etc.)
- Housing or components declared lead-free by a certified inspector or risk assessor
- Emergency renovations and repairs
- Minor repairs and maintenance that disturb two square feet or less of paint per component

## Sample Forms

The forms on the next two pages are sample forms you can use to make documentation of compliance easier.

### Confirmation of Receipt of Lead Pamphlet

I have received a copy of the pamphlet, *Protect Your Family From Lead in Your Home*, informing me of the potential risk of the lead hazard exposure from renovation activity to be performed in my dwelling unit. I received this pamphlet before the work began.

Printed name of recipient \_\_\_\_\_

Date \_\_\_\_\_

Signature of recipient \_\_\_\_\_

### Self-Certification Option (for tenant-occupied dwellings only) —

If the lead pamphlet was delivered but a tenant signature was not obtainable, you may check the appropriate box below.

☐ **Refusal to sign** — I certify that I have made a good faith effort to deliver the pamphlet, *Protect your Family From Lead in Your Home*, to the rental dwelling unit listed below at the date and time indicated and that the occupant refused to sign the confirmation of receipt. I further certify that I have left a copy of the pamphlet at the unit with the occupant.

☐ **Unavailable for signature** — I certify that I have made a good faith effort to deliver the pamphlet, *Protect Your Family From Lead in Your Home*, to the rental dwelling unit listed below and that the occupant was unavailable to sign the confirmation of receipt. I further certify that I have left a copy of the pamphlet at the unit by sliding it under the door.

Printed name of person certifying lead pamphlet delivery \_\_\_\_\_

Attempted delivery date and time \_\_\_\_\_

Signature of person certifying lead pamphlet delivery \_\_\_\_\_

Unit Address \_\_\_\_\_

**Note Regarding Mailing Option** — As an alternative to delivery in person, you may mail the lead pamphlet to the owner and/or tenant. Pamphlet must be mailed at least 7 days before renovation (Document with a certificate of mailing from the post office).

## Key Terms (continued)

**Renovation** — modification of all or part of any existing structure in housing that disturbs a painted surface. Includes:

- Removal/modification of painted surfaces, components, or structures
- Surface preparation activities (sanding/scraping/other activities that may create paint dust)
- Window replacement

- Examples 1:** Demolition of painted walls or ceilings  
**2:** Large surface replastering  
**3:** Major plumbing repairs or improvements  
**4:** Any other activities which disturb painted surfaces

**Renovation Notice** — notice to tenants of renovations in common areas of multifamily housing. (See sample form on page 12.) Notice must describe nature, location, and expected timing of renovation activity; and must explain how the lead pamphlet may be obtained free of charge.

**Renovator** — a person who performs for compensation a renovation, as defined above. (**Note:** Because the term “renovation” is defined broadly by Lead PRE, many contractors who are not generally considered to “renovators,” as that term is commonly used, are considered to be “renovators” under Lead PRE, and must follow Lead PRE requirements.)

**Self-Certification of Delivery** — an alternative method of documenting delivery of the lead pamphlet to a tenant. This method may be used whenever the tenant is unavailable or unwilling to sign a confirmation of receipt of lead pamphlet. (See sample form on page 11.) (**Note:** This method is not a permissible substitute for documenting delivery of the lead pamphlet to an owner.)

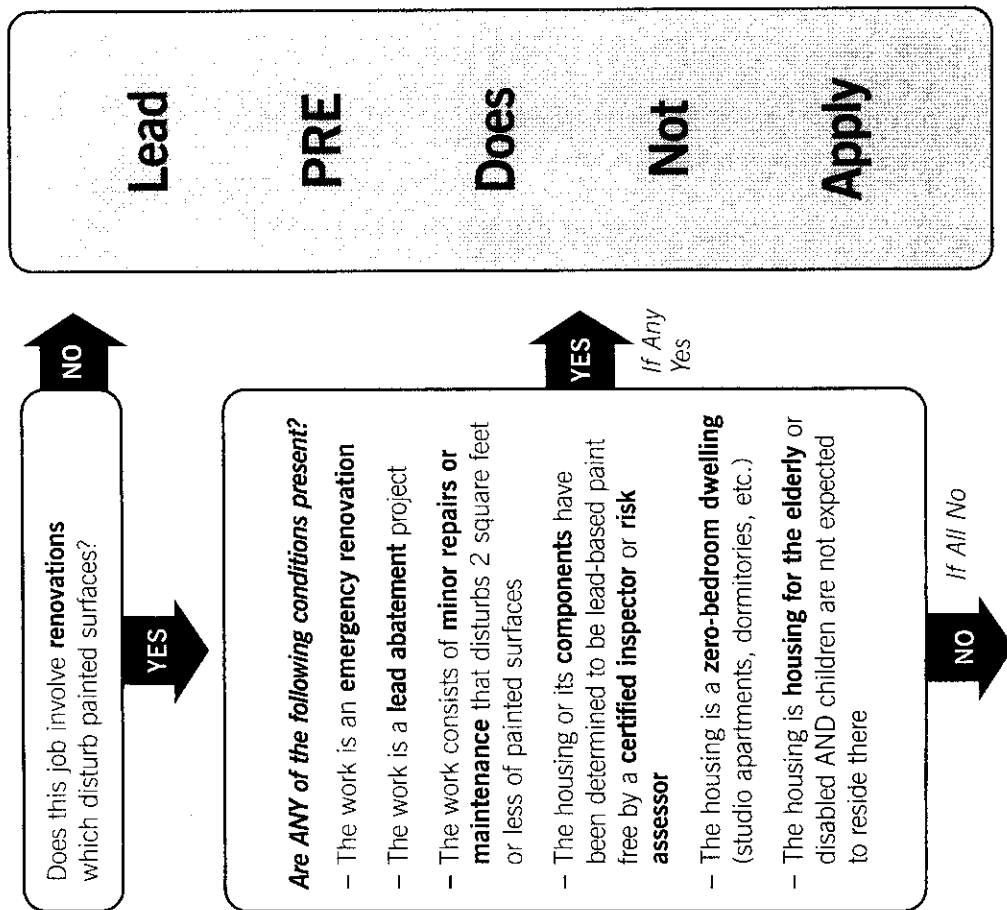

**Special Trade Contractors** — individuals or companies performing work in specialized occupations such as painting, electrical work, plumbing, or carpentry.

**Supplemental Renovation Notice** — additional notification that is required when the scope, location, or timing of project changes.

**Zero-Bedroom Dwelling** — any residential dwelling where the living area is not separated from the sleeping area. This term includes efficiency and studio apartments, dormitory housing, and military barracks.

## Lead PRE At-A-Glance

If you will be working for **compensation** in a pre-1978 home or apartment building, answer the questions below to determine if Lead PRE requires you to give the **lead pamphlet** to the **owner** and occupants.

If no, then you need to provide the lead pamphlet (see page 4).

# How Do I Meet The Lead PRE Requirements?

## Renovation Location

## Procedures to Follow

Box 1

Renovations in Owner-Occupied Dwelling Units

Deliver **lead pamphlet** to owner before **renovation** begins and obtain **confirmation of receipt**. (sample form on page 11).

OR

Mail lead pamphlet to owner 7 days before renovation begins and document with **certificate of mailing**

Box 2

Renovations in Tenant-Occupied Dwelling Units

1. Provide **lead pamphlet** to owner using either procedure described in Box 1 above.

2. Provide lead pamphlet to tenant by either method below:

(a) Deliver pamphlet to dwelling unit before **renovation** begins and document delivery with either a **confirmation of receipt** of lead pamphlet or a **self-certification of delivery** (sample form on page 11).

OR

(b) Mail lead pamphlet to tenant at least 7 days prior to renovation and document with a **certificate of mailing**

Box 3

Renovations in Common Areas of Multi-Family Housing Units

1. Provide **owner** with **lead pamphlet** using either procedure described in Box 1 above.

2. Notify tenants and make pamphlet available.

3. Maintain written documentation describing notification procedures.

4. Provide **supplemental renovation notice** if changes occur in location, timing, or scope of renovation occurring.

For all options keep records for 3 years after renovation is completed. (Sample Forms on pages 11 and 12.)

## Key Terms (continued)

**Emergency Renovation** — unplanned renovation activities done in response to a sudden, unexpected event which, if not immediately attended to presents a safety or public health hazard, or threatens property with significant damage.

**Examples 1:** Renovation to repair damage from a tree that fell on a house  
**2:** Renovation to repair a water pipe break in an apartment complex

**General Contractor** — one who contracts for the construction of an entire building or project, rather than for a portion of the work. The general contractor hires subcontractors (e.g. plumbing, electrical, etc.), coordinates all work, and is responsible for payment to subcontractors.

**Housing for the Elderly** — retirement communities or similar types of housing specifically reserved for households of one or more persons 62 years of age or older at the time the unit is first occupied.

**Lead Abatement** — work designed to permanently eliminate lead-based paint hazards. If you are hired to do lead-abatement work only, Lead PRE does not apply. Abatement does not include renovation, remodeling, landscaping, or other activities done to repair, restore, or redesign a given building — even if these activities incidentally reduce lead-based paint hazards. (**Note:** Some states define this term differently than described above. Consult your state officials if you are not sure how "lead abatement" is defined in your state.)

**Lead Pamphlet** — the pamphlet *Protecting Your Family From Lead in Your Home*, or an EPA-approved alternative pamphlet. (See page 13 for information on obtaining copies.)

**Minor Repair and Maintenance** — minor repair and maintenance activities, such as minor electrical work or plumbing, that disturb two square feet or less of painted surface per component.

**Examples 1:** Drilling holes in the wall to run an electrical line  
**2:** Replacing a piece of window trim  
**3:** Replacing a light fixture

**Multi-family Housing** — housing property consisting of more than four dwelling units.

**Owner** — any person or entity that has legal title to housing, including individuals, partnerships, corporations, government agencies, Indian Tribes, and nonprofit organizations.

**Record of Notification** — written statement documenting the steps taken to notify occupants of renovation activities in common areas of multi-family housing. (See page 12 for sample.)

## Key Terms

**Certificate of Mailing** — written verification from the Postal Service that you mailed the lead pamphlet to an owner or a tenant. This is less expensive than certified mail, which is also acceptable for meeting Lead PRE requirements. (**Note:** If using this delivery option, you must mail the pamphlet at least 7 days prior to the start of renovation.)

**Certified Inspector or Risk Assessor** — an individual who has been trained and is certified by EPA or an authorized state or Indian Tribe to conduct lead-based paint inspections or risk assessments.

**Common Area** — a portion of a building that is generally accessible to all residents or users. Common areas include (but are not limited to) hallways, stairways, laundry rooms, recreational rooms, playgrounds, community centers, and fenced areas. The term applies to both interiors and exteriors of the building. (**Note:** Lead PRE requirements related to common areas apply only to multi-family housing.)

**Compensation** — payment or goods for services rendered. Payment can be in the form of money, goods, or services (bartering).

**Component** — specific design or structural element or fixture distinguished by its form, function, and location. A component can be located inside or outside the dwelling.

### Examples

#### Interiors

Ceilings  
Crown molding  
Walls  
Doors and trim  
Floors  
Fireplaces  
Radiators  
Shelves  
Stair treads  
Windows and trim  
Built-in cabinets  
Beams  
Bathroom vanities  
Counter tops  
Air conditioners

#### Exterior

Painted roofing  
Chimneys  
Flashing  
Gutters and downspouts  
Ceilings  
Soffits  
Doors and trim  
Fences  
Floors  
Joists  
Handrails  
Window sills and sashes  
Air conditioners

## Special Circumstances

**Is painting considered renovation, even if no surface preparation activity occurs?**

No. If the surface to be painted is not disturbed by sanding, scraping, or other activities that may cause dust, the work is not considered renovation and Lead PRE does not apply.

**What if I renovate my own home?**

Lead PRE applies only to renovations performed for compensation; therefore, if you work on your own home Lead PRE does not apply.

**Is a renovation performed by a landlord or employees of a property management firm considered a compensated renovation under Lead PRE?**

Yes. The receipt of rent payments or salaries derived from rent payments is considered compensation under Lead PRE. Therefore, renovation activities performed by landlords or employees of landlords are covered.

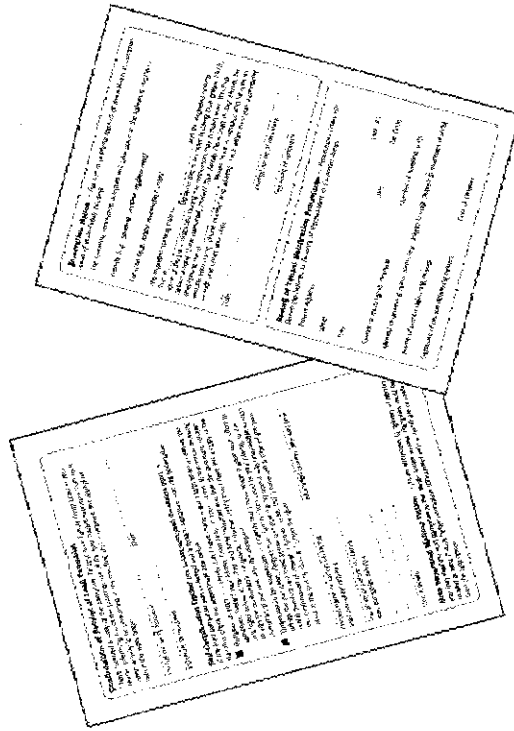

**Do I have to give out the lead pamphlet 7 days prior to beginning renovation activities?**

The 7-day advance delivery requirement applies only when you deliver the lead pamphlet via mail; otherwise, you may deliver the pamphlet anytime before the renovation begins. Note, however, that the renovation must begin within 60 days of the date that the pamphlet is delivered. So for example, if your renovation is to begin May 30, you may deliver the pamphlet in person anytime between April 1 and start of the project on May 30, or you may deliver the pamphlet via mail anytime between April 1 and May 23.

**Confirmation of Receipt of Lead Pamphlet** — a form that is signed by the owner or tenant of the housing confirming that they received a copy of the lead pamphlet before the renovation began. (See sample on page 11.)

## Tips For Easy Compliance

1. Copy and use the sample forms on pages 11 and 12 of this handbook.
2. Attach the forms to the back of your customer **renovation** or repair contracts. The completed forms can be filed along with your regular paperwork.
3. If a tenant is not home or refuses to sign the form, you may use the "self-certification" section of the form (on page 11) to prove delivery. This will reduce your paperwork.
4. Plan ahead to obtain enough copies of the **lead pamphlet**.

## Where Can I Obtain More Information on Lead PRE?

Further information is available from the National Lead Information Clearinghouse (800-424-LEAD) or through the Internet ([www.epa.gov/lead](http://www.epa.gov/lead)). Available resources include:

- Full text version of Lead PRE
- Interactive software which guides the users through the Lead PRE requirements on a step-by-step basis
- Interpretive guidance which provides more detailed information on Lead PRE requirements

## Why is Lead Paint Dangerous?

People can ingest lead by breathing or swallowing lead-based paint dust or by eating lead-contaminated soil or lead-based paint chips. Household animals are also at risk.

**If not detected early, high levels of lead in a child can cause serious effects, including:**

- Damage to the brain and nervous system
- Behavior and learning problems
- Slowed growth
- Hearing problems
- Headaches

**Lead is also harmful to adults and can, among other effects, cause:**

- Difficulties during pregnancy
- Other reproductive problems for men and women
- High blood pressure
- Digestive problems
- Nerve disorders
- Memory and concentration problems
- Muscle and joint pain

**Lead can be dangerous to workers and their families if the worker brings equipment and clothing home after a job.**

## Other Resources

For additional information on how to protect yourself and your customers from lead paint hazards, call the National Lead Information Clearinghouse at 1-800-424-LEAD. Available documents include:

- *Lead-Based Paint: Operations and Maintenance*
- *Work Practices Manual for Homes and Buildings*
- *Lead Safety for Property Owners, Developers, and Managers*
- *Reducing Lead Hazards When Remodeling Your Home*
- *Lead in Your Home: A Parents' Reference Guide*
- *Lead Paint Safety: A Field Guide for Painting, Home Maintenance, and Renovation Work*

**Disclosure Forms on Lead-Based Paint and/or  
Lead-Based Paint Hazards**

## Disclosure of Information on Lead-Based Paint and/or Lead-Based Paint Hazards

### Lead Warning Statement

*Housing built before 1978 may contain lead-based paint. Lead from paint, paint chips, and dust can pose health hazards if not managed properly. Lead exposure is especially harmful to young children and pregnant women. Before renting pre-1978 housing, lessors must disclose the presence of known lead-based paint and/or lead-based paint hazards in the dwelling. Lessees must also receive a federally approved pamphlet on lead poisoning prevention.*

### Lessor's Disclosure

(a) Presence of lead-based paint and/or lead-based paint hazards (check (i) or (ii) below):

(i) \_\_\_\_\_ Known lead-based paint and/or lead-based paint hazards are present in the housing (explain).

\_\_\_\_\_

(ii) \_\_\_\_\_ Lessor has no knowledge of lead-based paint and/or lead-based paint hazards in the housing.

(b) Records and reports available to the lessor (check (i) or (ii) below):

(i) \_\_\_\_\_ Lessor has provided the lessee with all available records and reports pertaining to lead-based paint and/or lead-based paint hazards in the housing (list documents below).

\_\_\_\_\_

(ii) \_\_\_\_\_ Lessor has no reports or records pertaining to lead-based paint and/or lead-based paint hazards in the housing.

### Lessee's Acknowledgment (initial)

(c) \_\_\_\_\_ Lessee has received copies of all information listed above.

(d) \_\_\_\_\_ Lessee has received the pamphlet *Protect Your Family from Lead in Your Home*.

### Agent's Acknowledgment (initial)

(e) \_\_\_\_\_ Agent has informed the lessor of the lessor's obligations under 42 U.S.C. 4852(d) and is aware of his/her responsibility to ensure compliance.

### Certification of Accuracy

The following parties have reviewed the information above and certify, to the best of their knowledge, that the information they have provided is true and accurate.

_____ Agent	_____ Date	_____ Agent	_____ Date

## Disclosure of Information on Lead-Based Paint and/or Lead-Based Paint Hazards

### Lead Warning Statement

*Every purchaser of any interest in residential real property on which a residential dwelling was built prior to 1978 is notified that such property may present exposure to lead from lead-based paint that may place young children at risk of developing lead poisoning. Lead poisoning in young children may produce permanent neurological damage, including learning disabilities, reduced intelligence quotient, behavioral problems, and impaired memory. Lead poisoning also poses a particular risk to pregnant women. The seller of any interest in residential real property is required to provide the buyer with any information on lead-based paint hazards from risk assessments or inspections in the seller's possession and notify the buyer of any known lead-based paint hazards. A risk assessment or inspection for possible lead-based paint hazards is recommended prior to purchase.*

### Seller's Disclosure

(a) Presence of lead-based paint and/or lead-based paint hazards (check (i) or (ii) below):

(i) \_\_\_\_\_ Known lead-based paint and/or lead-based paint hazards are present in the housing (explain).

\_\_\_\_\_  
(ii) \_\_\_\_\_ Seller has no knowledge of lead-based paint and/or lead-based paint hazards in the housing.

(b) Records and reports available to the seller (check (i) or (ii) below):

(i) \_\_\_\_\_ Seller has provided the purchaser with all available records and reports pertaining to lead-based paint and/or lead-based paint hazards in the housing (list documents below).

\_\_\_\_\_  
(ii) \_\_\_\_\_ Seller has no reports or records pertaining to lead-based paint and/or lead-based paint hazards in the housing.

### Purchaser's Acknowledgment (initial)

(c) \_\_\_\_\_ Purchaser has received copies of all information listed above.

(d) \_\_\_\_\_ Purchaser has received the pamphlet *Protect Your Family from Lead in Your Home*.

(e) Purchaser has (check (i) or (ii) below):

(i) \_\_\_\_\_ received a 10-day opportunity (or mutually agreed upon period) to conduct a risk assessment or inspection for the presence of lead-based paint and/or lead-based paint hazards; or

(ii) \_\_\_\_\_ waived the opportunity to conduct a risk assessment or inspection for the presence of lead-based paint and/or lead-based paint hazards.

### Agent's Acknowledgment (initial)

(f) \_\_\_\_\_ Agent has informed the seller of the seller's obligations under 42 U.S.C. 4852(d) and is aware of his/her responsibility to ensure compliance.

### Certification of Accuracy

The following parties have reviewed the information above and certify, to the best of their knowledge, that the information they have provided is true and accurate.
